B

Character Sets & Escape Sequences

The tables overleaf list the full ISO Latin1 character set used by ***Ovation Pro***. They give the keyboard code number followed by the character in Arial (which will be the same as most script fonts), DPDings (identical to Selwyn which is like Dingbats but with a different character order) and Symbol (identical to SymbolB and Sidney) fonts. Characters not available directly from the keyboard may be obtained by holding down Alt and typing the code on the numeric keypad. When Alt is released, the character is inserted at the caret position. Alternatively you may use the Characters facility on the Misc menu or the single shift font change facility to insert non-standard characters.

The final column gives the escape sequence that may be used to represent special characters in macro definitions (SEE 16.5).
